BEAN-TO-CUP BN50

RICCO  FABIO™

## BEAN-TO-CUP MODEL BN50

The BN50 is a compact HIGH CAPACITY bean-to-cup coffee machine with a fully automatic FRESH MILK frother for the perfect cappuccino.

This Ricco Fabio machine will dispense every size of drink from a one-shot espresso to an Americano or a full cappuccino, at the touch of a button – true versatility.

The BN50 can use either its own inbuilt 3 litre water reservoir or connect directly to the mains water supply.

The large 600 gram bean hopper has sufficient capacity to dispense up to 100 cups between each coffee bean replenishment.

The BN50 is engineered to exacting standards and is designed to be sited in high usage locations where it will give many years of consistent trouble free service.

# True Italian Espresso and Cappuccino

The BN55 model incorporates the same features as the BN50 except that the milk frother is replaced by a steamer arm for continuous hot water or steam dispensing.
